**Subject:** RE: talking points for next week

Thanks so much Deldi. I will be looking forward to that information. Lily went out to inspect the Shipyard this morning and found a couple of trucks that were partially covered and was able to get the contractors to education its subs. She also was able to talk to Jermaine Smith, Lennar Contracts Manager about going the meeting on the 16<sup>th</sup>. He said he would bring it back to his office and see if they will be able to attend. FYI, Jackie

**Subject:** talking points for next week

**Hunters Point Environmental Justice Task Force (San Francisco, CA):** On September 9, the Hunters Point Superfund team, Enforcement Division management and the Region's EJ coordinator discussed the following inquiries received from the Bayview EJ Taskforce via its online community reporting system: (1) EPA's dust control enforcement capabilities with the Candlestick demolition project, and (2) information on how to file a Title VI complaint. Since inquiries were lodged with the taskforce, the local Bay Area Air Quality Management District issued a "Notice of Violation" last week to Lennar concerning its dust practices at the construction site. In the meantime, the Enforcement staff and Deldi Reyes will write talking points to present at the next task force meeting on September 16, 2015 at Southeast College. EPA Superfund will be coordinating messaging with the BAAQMD before the meeting. (Contact: Jackie Lane, x2-3236 or Lily Lee, x7-4187)

Lily and Jackie, thanks for getting us together this week. Apologies for leaving the meeting early.

I just confirmed with Joel that he or Matt will send you some language about CAA and enforcement roles.

I've also asked Michael to weigh in with some talking points about the process communities can use to file a complaint.

You can also share this information with the task force:

On September 10, 2015, US EPA's Office of Civil Rights released the draft External Compliance and Complaints Program Strategic Plan for FY 2015-2020. The Plan promotes mission-critical program accountability through measurable goals that will: 1) ensure prompt, effective and efficient complaint docket management; 2) enhance the Office of Civil Rights'(OCR) external compliance program through proactive compliance reviews, strategic policy development, and engagement of critical EPA, federal and external partners and stakeholders (e.g., recipients and communities); and 3) strengthen OCR's workforce through strategic human capital planning, organizational development and technology resources and training to promote a high-performing organization.

The Office of Civil Rights will be taking public comment on the plan for a thirty calendar day period.

The Office of Civil Rights also shared with EPA's National Environmental Justice Advisory Council on September 10, that they will be holding a number of listening sessions in four Regions across the country and a fifth session will be held in Washington D.C. As soon as more details are available, we will share them with you.

Let me know if you need anything else from me.

p.s. I sent the announcement out to my EJ listserv group list today as well and it will likely go out via the national OEJ listserv as well.
